

## FABPro automates real-time production and material tracking.

FabPro increases visibility, productivity, and accuracy in your facility to manage production and materials logistics as they move from drawing approval through site receiving.

By automating production tracking, FabPro can mitigate schedule risk by predicting whether due dates are realistic the moment work is loaded, and if materials available.

### Optimize Shop Floors

- Automate fabrication estimates, timesheet reports, and process improvement feedback in real-time.
- Model Driven, PDFs, or Hand Drawn: FabPro simplifies your workflows to standardize and optimize production
- Simple and easy to use for the shop floor to view priority work and the order it needs to be done.

*Having a second-to-none fabrication team work seamlessly with the Detailers and onsite construction crews makes MSUITE's innovative technology unique and remarkable.*

David Conley, Director of Manufacturing

### FEATURES & BENEFITS

- 
**Waste Reduction**  
 With integrations into machines like TigerStop, RazorGauge, Watts, HGG, and PypeServer FabPro is able to optimize your cutting processes.
- 
**Increase Productivity**  
 FabPro automatically turns shop floor production data into actionable insights you can use to improve your efficiency and productivity.
- 
**Streamlined Communication**  
 Streamlines communications between office, shop, and field teams with real-time notifications for approvals for fabrication, drawing markups, trucks leaving the shop, and more.
- 
**Configurable Workflows**  
 Structure & streamline workflows to connect, automate and optimize work processes between design, fabrication and the field teams.
