

Improve staff productivity and efficiency

Timecard Automation for the Fab Shop

- Saves Time
- Improves Timesheet Accuracy
- Eliminate Double Entry
- Boosts Employee Productivity

Key Benefits of Timecard Automation for the Fab Shop

1. Saves Time

Eliminate the manual effort and hours spent on time entry, timecard submission, review, and analysis. By passively automating time tracking the data capturing and approval process becomes much more seamless.

2. Improves Timecard Accuracy

Automated timecards provide a more detailed and accurate account of tasks, cost codes and activities as there is no room for human error. This gives you better insight into how you and your team members utilize time, allowing you to spot inefficiencies, letting you know which work is most profitable.

3. Eliminates Double Entry

MSUITE allows you to export timecard data in a format that easily imports to your Accounting/ERP system. This saves your team time and eliminates human error that comes with double entry.

4. Boosts Employee Productivity

MSUITE's time tracking shows each employee's total time on their tasks and cost code. This allows you to understand time use better and distribute workload according to their expected output. MSUITE also provides essential project performance data to identify potential bottlenecks in your shop.
