

Elevate Your Electrical Workshop with MSUITE Fab

- **One-Stop Solution: Effortlessly Monitor Status & Production**
- **Achieve Unmatched Material Precision from Design to Delivery**
- **User-Friendly Interface for Seamless Shop Floor Integration**

Unlock enhanced **Visibility, Productivity, and Precision** in your Electrical Prefabrication Operations with **MSUITE Fab**.

PREFAB SHOP BENEFITS

OPTIMIZE THROUGHPUT/TIME TRACKING

Uncover the exact time it takes to complete tasks using MSUITE Fab, enabling you to refine processes and focus on the most efficient work in your electrical prefabrication projects.

MATERIAL SHIPMENT COORDINATION

MSUITE integrates Bill of Lading management, enabling seamless communication between Project Managers, Fab Shop Managers, and Field Personnel for accurate and up-to-date scheduling.

COMPREHENSIVE REAL-TIME TRACKING

Synchronize PMs, Engineers, and Fab Shop Managers with unified status monitoring from project inception to completion.

STREAMLINED USER EXPERIENCE

MSUITE's focused interface presents only essential tasks in the required order, minimizing distractions for maximum productivity.

MSUITE FAB FEATURES

Digital QA QC (NDE)

Improve the integrity and accuracy of your QA & QC program by digitally tracking your Nondestructive Evaluations (NDE).

PDF Mark-Up

Create and capture all markups documented with the drawings to handover.

Actionable Insights

MSUITE is a data rich platform that will take your data into account to produce more actionable insights for your team to improve

Drawing Approval

Integrates the digital approval process in one system. Verify drawing accuracy, BOM, cuts, joints & fabrication readiness.

Machine Integration

Feed cuts from Revit to MSUITE to machine controllers while collecting productivity data. TigerStop, RazorGage, & more

Cloud-Based & iPad App

Securely access MSUITE FAB anywhere, from any device. Custom role and user-based permissions control access to the data.

Automated Engineering to Shop

Improve the handover experience from engineering and detailing to fabrication.

Material, Status, & Productivity Tracking

Get notifications of backorders and missing items; Track heat numbers, automated status log, and leverage passive tracking for real-time earned value & project analytics.

Automated Timesheets

Automated shift & cost code tracking provides accurate data for daily time-sheets.

Real-Time Prefabrication Analytics

Sortable, filterable tables allow for unique data flexibility & customization. Leverage reports and custom dashboards.

Close Out Documentation

Automatically generate multiple documents such as: Drawing Status Report, Weld Tracking, BOL, & Final Drawing Markups.

Custom Spec-Driven Workflows

Companies can define their own workflows & stages. Select visible data at each stage & create conditional workflows to follow project specs.

Priority Levels

Drawings & Spool priority can be managed from anywhere instantly identifying rush order drawings vs. drawings on hold.

Shipping Calendar

Manage your shipment requests & due dates. Automatic creation of BOL including collated drawings when loading the truck. Digital receiving stages.
