BOOST YOUR SHEET METAL SHOP'S PERFORMANCE.

AUTOMATE PRODUCTION AND MATERIAL TRACKING.

MSuite increases visibility, productivity, and accuracy in your sheet metal fabrication facility to manage production and materials logistics from drawing approval to shipping.

By automating production tracking, MSuite can mitigate schedule risk by predicting whether due dates are realistic the moment work is loaded, and if materials available.

I would emphasize that MSuite is a catalyst for organizational efficiency. It has significantly improved the quality and amount of data available to manage our capacity and processes, making us more organized and efficient."

MARK VAN SICKLE

VP of Manufacturing,
Streimer

MAJ FILE MANAGEMENT

- Automates and streamlines the BIM-to-fabrication workflow, enabling seamless integration, reducing manual errors, and accelerating project delivery.

SHOP CAPACITY MANAGEMENT

- Optimizes resource utilization, enables scalable operations to meet project demands, and increases profitability by reducing overhead and streamlining workflows for sheet metal contractors.

INCREASE PRODUCTIVITY

- Turns shop floor production data into actionable weight and time sheet metrics you can use to improve your efficiency and productivity.

CONFIGURABLE WORKFLOWS

- Custom Sheet Metal workflows to track by weight. This workflow enables new columns at both the drawing and package level to account for calculated weight, including estimated budget.
