GET NEXT LEVEL GAME CHANGING RESPONSIVENESS.

REACTIVE & SMART HANGERS

Hangers adapt to MEP model changes by automatically adjusting and adding/removing hangers. Ensures that hangers remain correctly positioned and sized as the design is updated.

MODEL HANGERS & SYSTEMS SIMULTANEOUSLY

Solve the timeline for modeling hangers to allow users to model hangers while drawing their MEP systems. Crush tight deadlines, while maintaining extreme accuracy.

ELIMINATE MANUAL PROCESSES

Utilize automated field points, beam detection, and pipe clamps to streamline the hanger process, reducing manual labor and increasing efficiency.

SINGLE & MULTI-TIER TRAPEZE HANGERS

Provides flexibility for single and multi-tier trapeze hangers, allowing users to create complex or simpler hanger configurations.
